Google Landing Page

Project Documentation

Version 1.0 | 2026
HTML / CSS / JavaScript

1. Project Overview

This project is a responsive, dark-themed promotional website for Android by Google. It showcases Gemini AI features, available smartphones, key Android capabilities, and an Android XR teaser — all wrapped in a polished single-page layout with smooth scrolling and mobile-first navigation.

1.1 Tech Stack

Layer	Technology	Notes
Markup	HTML5	Semantic sectioning, anchor IDs
Styling	CSS3	Custom properties, Grid, Flexbox
Behaviour	Vanilla JavaScript (ES6)	No frameworks or build tools
Icons	Font Awesome 6.6.0 (CDN)	Social icons, hamburger menu
Media	MP4 video (local)	Hero background — android.mp4

1.2 Design Tokens

CSS Variable	Value	Usage
--accent	#34a853	Google green — buttons, logo, highlights
--dark	#0a0a0a	Page background
--card	#111111	Card & section backgrounds

2. File Structure

File	Type	Responsibility
a1.html	HTML	Page structure — all sections, navigation, links
a1.css	CSS	All visual styles, layout, and media queries
a1.js	JavaScript	Mobile menu, smooth scrolling, contact form handler
android.mp4	Video (add manually)	Hero section full-screen background video

3. HTML Structure (a1.html)

3.1 Page Sections

Section	Anchor ID	Description
Header	—	Fixed navigation bar with logo, nav links, and Shop button
Hero	#hero	Full-screen video background with two CTA buttons
Gemini AI	#gemini	Two feature cards — Gemini Live and Circle to Search
Phones	#phones	Four phone cards: Pixel 10 Pro, Pixel 10, Galaxy S26 Ultra, OnePlus 13
Features	#features	Three capability cards — Private Compute Core, Quick Share, Adaptive Battery
Android XR	#xr	Coming-soon teaser for XR eyewear
Contact	—	Name / Email / Message form
Footer	—	Links grid, social icons, copyright

3.2 External CDN Dependencies

Library	Version	URL
Font Awesome	6.6.0	cdnjs.cloudflare.com — icons

4. Stylesheet (a1.css)

4.1 Button Classes

Class	Background	Text Color	Usage
.shop-btn	--accent green	Black	Header Shop Phones button
.cta-btn.primary	--accent green	Black	Hero primary call-to-action
.cta-btn.secondary	Transparent + white border	White	Hero secondary call-to-action
.phone-btn	--accent green	Black	Phone card Shop Now button
.learn-btn	Transparent + green border	--accent green	Feature / AI learn-more links

4.2 Layout System

- Cards grid: CSS Grid with auto-fit + minmax(380px, 1fr)
- Phones grid: CSS Grid with auto-fit + minmax(300px, 1fr)
- Footer grid: CSS Grid with auto-fit + minmax(180px, 1fr)
- Hero: 100vh with absolutely-positioned <video> (z-index: -1)
- Header: position: fixed + backdrop-filter: blur(12px)

4.3 Responsive Breakpoint

A single breakpoint at max-width: 768px handles:

- Hero h1 font size shrinks from 4.8rem to 3.2rem
- Horizontal nav transforms into a slide-in mobile drawer (left: -100% → left: 0)
- Hamburger toggle icon (.menu-toggle) becomes visible

5. JavaScript (a1.js)

5.1 Feature Summary

Feature	Trigger	Behaviour
Mobile Menu	Click on ☰ icon	Toggles .active class on — slides nav drawer in/out
Smooth Scroll	Click on any href='#...' anchor	Calls scrollIntoView({ behavior: 'smooth' }) on the target element; auto-closes mobile menu on small screens
Contact Form	Form submit event	Prevents default, shows demo alert, then resets all fields

6. Customization Guide

6.1 Change Accent Color

Edit a single CSS variable in a1.css:

```
:root {
  --accent: #34a853; /* swap for any hex value */
}
```

6.2 Add a Phone Card

Copy and paste the following block inside `.phones-grid` in `a1.html`:

```
<div class="phone-card">
  
  <h3>Phone Name</h3>
  <p>Tagline</p>
  <a href="SHOP_URL" target="_blank" class="phone-btn">Shop Now</a>
</div>
```

6.3 Replace Hero Video

Place your video file in the project folder and update the source tag:

```
<source src="your-video.mp4" type="video/mp4">
```

6.4 Wire Up the Contact Form

Replace the demo alert in `a1.js` with a real API call, for example using Formspree:

```
contactForm.addEventListener('submit', async function(e) {
  e.preventDefault();
  await fetch('https://formspree.io/f/YOUR_ID', {
    method: 'POST', body: new FormData(this)
  });
});
```

7. External Links

Destination	Purpose
store.google.com	Header Shop Phones button + Hero secondary CTA
android.com/ai/	Gemini Live — Learn More
android.com/ai/circle-to-search/	Circle to Search — Learn More
samsung.com	Galaxy S26 Ultra — Shop Now
oneplus.com	OnePlus 13 — Shop Now
android.com	Features & XR section — Learn More links
about.google	Footer — About
developer.android.com	Footer — Developers
support.google.com/android	Footer — Help Center

Destination	Purpose
policies.google.com/privacy	Footer — Privacy
twitter.com/Android	Footer social icon
facebook.com/Android	Footer social icon
instagram.com/android	Footer social icon
youtube.com/android	Footer social icon

8. Notes & Known Limitations

- Phone card images are loaded from Amazon CDN (m.media-amazon.com). Replace with self-hosted images for production.
- Gemini section cards use picsum.photos placeholder images. Swap for real product imagery before going live.
- The hero section shows a plain dark background if `android.mp4` is missing. Add the video file to the project folder.
- The contact form is a demo only — messages are not sent anywhere. Wire it to a real backend (Formspree, EmailJS, etc.) for production use.
- The copyright line reads © 2026 Google LLC — update as needed.
- Font Awesome is loaded from a CDN. For offline use, download and serve the library locally.
